Compost Connect: Exhibit Hall Tour

This tour is designed to give attendees practical, real-world insights into running a safer, more productive, and more profitable operation. Participants will visit a series of exhibitors, each highlighting a critical aspect of operational excellence, from equipment maintenance and workplace safety to contamination management, process optimization, and supplier partnerships.

Using headsets to clearly hear the tour leaders and industry experts throughout the exhibit hall, small groups of 18 attendees will move from stop to stop, hearing directly from experts, observing innovative technologies and solutions, and learning proven best practices that can be implemented immediately within their own operations.

This is an unmatched opportunity to be in a peer group setting led by an experienced guide, to connect everyday ground-level decisions with operational expertise.

The tour will focus on key pillars of success:

- Maintenance, Safety and Efficiency – Learn practical strategies for preventive maintenance, equipment inspections, wear-part management, hazard recognition, and operator accountability while improving uptime, material flow, throughput, and overall operational efficiency.
- Contamination Management – See technologies and processes that help identify, remove, and reduce contaminants while improving product quality and protecting equipment.
- Supplier Partnerships – Understand how strong relationships with equipment manufacturers, dealers, and service providers can improve performance through training, technical support, parts management, and long-term business planning.

Throughout the tour, invited exhibitors will share case studies, operational lessons learned, and practical solutions that attendees can apply to improve uptime, enhance safety, reduce operating costs, and strengthen overall business performance. By the end of the experience, participants will gain actionable ideas and valuable industry connections to help drive continuous improvement within their operations.

Registration: \$25. When you arrive onsite for Compost Connect, you will receive a free 35th Annual Conference T-shirt! **Space limited to 54 participants.**
