

Pre Conference Tour - HALF DAY
8:30 AM to 12:00 PM / 1:00 PM - 4:30 PM

Facility Tour: Sunshine Organics & Compost

Tour Sunshine Organics & Compost, a permitted Jacksonville facility diverting food and yard waste from landfills and transforming these materials into nutrient-rich compost and biochar. Attendees will get an inside look at a large-scale organics processing operation currently diverting approximately 36,000 tons of wood and yard waste and 7,800 tons of food waste annually, with capacity to process up to 60,000 tons per year.

If you attended this popular tour in 2024, things have evolved and changed! The tour will highlight Sunshine's expansion through a \$4.9 million USDA grant, including a high-temperature pyrolysis system for producing biochar. Participants will learn how these technologies are being integrated to increase processing capacity, produce soil amendments, and create additional outlets for compost and biochar in local agriculture and community gardens.

Fee: \$202.00 for USCC members / \$280.00 for nonmembers

Duration: 8:30 AM to 12:00 PM OR 1:00 PM - 4:30 PM

Date: February 1, 2027
